Professional Summary

Computer Science and Engineering graduate with knowledge of Python, SQL, Java, HTML, CSS, JavaScript, Object-Oriented Programming, and Database Management Systems. Hands-on experience developing responsive web applications, machine learning solutions, interactive web tools, and agriculture-based applications. Strong problem-solving, communication, collaboration, and time-management skills, with experience participating in technical events, hackathons, and buildathons.

Technical Skills

- **Programming Languages:** Python, SQL, Java
- **Web Technologies:** HTML, CSS, JavaScript
- **Programming Concepts:** Object-Oriented Programming (OOP), Database Management Systems (DBMS)
- **Tools:** Visual Studio Code, Figma
- **Methodology:** Agile Methodology
- **Soft Skills:** Collaboration, Communication, Time Management, Consistency, Problem Solving

Projects

Genetic Disorder Prediction using Machine Learning

- Implemented supervised machine learning models including Logistic Regression, Random Forest, and Support Vector Machine (SVM) to classify potential genetic disorders.
- Performed feature engineering and Exploratory Data Analysis (EDA) on genomic and medical datasets to identify key biomarkers influencing disorder prediction.

Hyper Mart – Online Shopping Website

- Developed a responsive e-commerce web interface using HTML, CSS, and JavaScript.
- Created product listing pages and interactive user interface components including navigation bars, buttons, and search functionality to improve usability.
- **Technologies:** HTML, CSS, JavaScript
- **Live Demo:** [Live Demo](#)

BMI Calculator

- Developed an interactive BMI calculator that calculates Body Mass Index using height and weight inputs.
- Implemented BMI categorization based on health ranges and provided recommendations to promote healthy lifestyle awareness.

Smart Crop Recommendation System

- Developed an agriculture-focused website or application based on the concept of “Right Crop at Right Time in Right Soil.”
- Designed the solution to predict suitable crops based on climate and soil conditions, helping farmers make informed crop-selection decisions.

Education

Bachelor of Computer Science and Engineering

- Channabasaveshwara Institute of Technology

Graduated: 2026

CGPA: 8.1/10.0

Pre University Course

- Vidyanidhi Pre-University College

Completed: 2022

Percentage: 65%

Secondary School Leaving Certificate

- Sri Chaitanya Techno School

Completed: 2020

Percentage: 69%

Certifications

- Technical Certificate in Python
- Technical Certificate in Java
- Artificial Intelligence Certificate – Elements of AI
- Artificial Intelligence Certificate – Great Learning Academy

Achievements & Extracurricular Activities

- Organized Buildathon 2K25 at Channabasaveshwara Institute of Technology.
- Selected as a National Finalist in Ideathon – Final Round.
- Participated in a State-Level Hackathon at Atria University, Bengaluru.
- Participated in the National-Level Technical Fest, DSATM, Bengaluru.
- Designed a Figma prototype showcased during a technical event.
